

Chapter 2 Euler convention: roll about Y, pitch about X (dashed = reference frame, dotted = axis of rotation)

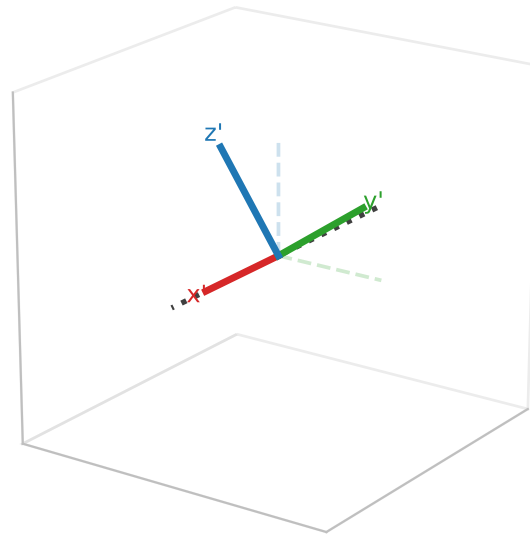

Yaw $\psi = 35^\circ$, about Z
Eq. (2.14)

Roll $\phi = 35^\circ$, about Y
Eq. (2.15)

Pitch $\theta = 35^\circ$, about X
Eq. (2.16)

Composed $C = R_x(\theta) R_y(\phi) R_z(\psi)$
Eq. (2.17)
